Art Unit: 2874

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The prior art documents submitted by the applicant in the Information Disclosure Statement filed on December 31, 2003 have all been considered and made of record (note the attached copy of form PTO-1449).

Drawings

3. This application has been filed with five (5) sheets of drawings, which have been approved by the Examiner.

Allowable Subject Matter

4. Claims 1-6 are allowed.

5. The following is an examiner's statement of reasons for allowance: The prior art cited is the most relevant prior art known. However, the invention of claims 1-6 distinguishes over the prior art for the following reasons.

6. U.S. Patent 6,374,006 to Islam et al. discloses an oscillator comprising a wavelength combiner 35 for receiving a pumping light beam λ_p ; a loop mirror 90; an amplifying fiber 60; a coupler 50; and a pair of chirped Bragg gratings 70 (Figure 10d for example). However, the claimed invention distinguishes over Islam et al., which discloses the loop mirror and the amplifying fiber on the same side of the combiner 35. The prior art of record does not disclose or reasonably suggest modifying the arrangement of Islam et al. to provide the amplifying fiber on a different side of the combiner than the loop mirror and therefore, does not disclose or render

obvious the claimed invention. Additionally, Islam et al. also does not disclose the chirped Bragg gratings to constitute a dual laser mode resonator in such a way that the light beams having different wavelengths bands are reflected in the optical fiber grating mirrors, respectively.

7. U.S. Patent Application Publication 2004/0086019 and U.S. Patent 6,608,949 to Kim et al. each disclose an optical oscillator constituting a dual mode resonator, but also do not disclose or reasonably suggest the claimed structural arrangement comprising a loop mirror connected to one side of a wavelength combiner, and an amplifying optical fiber connected to the other side of the wavelength combiner.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
